Experience

Cisco Internship | Technical Consulting Engineer DATA-CENTER | March 2023 (Currently)

I play a key role in crafting, implementing, automating, and supporting solutions that are essential to Cisco's strategy and operations

- Provide technical support and assistance to Cisco customers – Data Center solutions.
- Working on LAN, SAN and Virtualization Solutions
- Troubleshooting sessions with the customers.

Summer Internship | Mobile software developer | ITSector | (June-August) - 2022

I learn and work on a real-world project (AfricanBank) in ITSector, understanding the front-end of mobile development and how to approach the client.

- Java
- Kotlin
- Git

Academic Background

Bachelor in Telecommunications and Informatics Engineering | ISCTE | 2020-2023

I am on my way to obtaining a degree and this course guarantees the skills to simultaneously deal with engineering challenges in the areas of Telecommunications and Informatics. Developed a lot of projects in a team that help me develop some of my soft skills.
